

## Costume Contest Rules:

Players do not need to match but do need to be within your teams theme (i.e. clowns with different outfits)

During game time, player number needs to be on back of their costume, a pinned on number is fine and does not need to be a part of the costume shirt itself.

Costumes need to be family appropriate and not contain any obscene or vulgar words or themes.

While on the field players costumes need to be free of props (pirates don't need a sword on the field), you will be judged on team costumes when you are not in actively in a game and during that time you will need your props. Nothing should be coming off of your costume during gameplay.

Costumes cannot interfere with facemask or helmets, you will have time to put on your headgear props before judging.

Any other questions please let us know.
