Improper maintenance can result in significant damage to the fields and in the case of inclement weather/field conditions, the Winfield Park District will determine which fields are in playable condition and at what time. Fields may not be used unless authorized by a Winfield Park District representative.

Our tournament will abide by the above field regulations.

In the event of inclement weather, access the Winfield Park District website at www.winfieldparkdistrict.com. Field condition information is on the center-lower section of the home page.

15. TOURNAMENT FORMAT

Winfield Wolves Travel Baseball Tournament

- E. If the tournament is interrupted by bad weather and/or games need to be cancelled for any reason, an adjusted schedule and plan will be determined and implemented by each individual division coordinator.
- F. If the tournament is interrupted by bad weather and/or games need to be cancelled for any reason, teams in a pool may end up with an unequal amount of games played. In order for tie breaker rules to be applied, teams in a pool need to have an equal number of games played to be evaluated. Therefore, the number of games to be utilized will be determined by the team with the least amount of games played in that pool (least common games played). Games for teams that were played past (after) that least common games played mark will be eliminated from consideration in the tie breaker evaluation. For example, if the least common games played mark is 2 games, then only the first and second games played by each team will be used in the tie breaker evaluation. Likewise, if the least common games played mark is 1 game, then only the first game played by each team will be utilized in the tie breaker evaluation.
- G. In the event of inclement weather, the Playoff round may be eliminated and the top seed from each division/pool will play in the Championship game and the 2nd seeds in the Consolation game. This determination will be made by the Division Coordinator if necessary.
- H. Individual awards will be given to the top four (4) teams 9U-12U and top two teams 13U-14U.

WINFIELD IN ACTION

WEATHER SAFETY POLICY

At the first signs of lightning or thunder, all games and practices are to stop and teams are to leave the field immediately until safe conditions are apparent. You are advised to seek shelter in a substantial building or a fully enclosed vehicle with the windows completely shut. You should wait 30 minutes after the last observed lightning or thunder before you leave shelter. After 30 minutes, game officials and coaches will make a decision regarding the safe resumption of activities. The suspension of a game can be immediate if conditions are apparent that play cannot be resumed or if the game cannot be completed within given time limits.

Winfield in Action has installed THOR GUARD, a lightning *prediction* system, at the fields. When conditions indicate that a lightning occurrence is probable, a signal is sent to the alarm horns and strobe lights.

- A **Warning Signal** is one long 15-second horn blast. This means a potentially dangerous weather situation exists and all patrons **MUST** leave the fields and take shelter.
- A **Strobe Light** will flash until the All Clear horn blasts. No activities are allowed on the fields during this time.
- The **All Clear Signal** is three short horn blasts. After the All Clear Signal sounds and strobe lights deactivate, park patrons may resume their activities.

Winfield in Action's 30 minute policy supersedes the THOR GUARD system.

- If there is lightning or thunder before the warning signal has had a chance to blast, all games and practices are to stop and teams are to leave the field immediately. In this case, you should wait 30 minutes after the last observed lightning or thunder before you leave shelter. Game officials will make a decision regarding the safe resumption of activities.
- If the ALL CLEAR signal is sounded while lightning is still visible in the distance the mandatory 30 minute rule still applies to the situation.

Neither the signal nor the system is intended to guarantee that conditions are safe.

If the signs for lightning or thunder are evident, the National Lightning Safety Institute says:

- ❑ **AVOID** all metal objects including goalposts, bats, backstops, bleachers, fences, gates and machinery.
- ❑ **AVOID** picnic shelters, canopies and dugout areas. These are not safe from lightning.
- ❑ **AVOID** standing under or by trees.
- ❑ **AVOID** light poles, flagpoles and power poles.
- ❑ **AVOID** water, high ground and open spaces.

Lightning's behavior is random and unpredictable. Preparedness and quick response are the best defenses against the lightning hazard.

The THOR GUARD system consists of sensors that measure electrostatic charges at ground level and in the atmosphere. These electrostatic charges, invisible to the naked eye, build up in the atmosphere prior to lightning occurrences.
